International Direct Distance Dialing (IDDD) is the fastest, easiest, most direct way to reach these 70 countries. Here's how easy it is to place a call.

station-to-station calls

Dial:

- the international access code (011)
- the country code (the two or three-digit numbers above)
- the city routing code (a one to four-digit number)
- the local telephone number (a two to nine-digit number)

For example, to place a typical station-to-station call to a telephone number in Sydney, Australia, you would dial:

011 (international access code) + 61 (country code) + 2 (city routing code) + (local number).

In addition to calling station-to-station, if your telephone exchange is listed above, you can also place...

operator-assisted calls

- 01
- the country code
- the city routing code
- the local telephone number

An operator will answer to help complete your call.

For example, to place a person-to-person call to London, United Kingdom, you would dial:

01 (operator-assisted international access code) + 44 (country code) + 1 (city routing code) + (local number); an operator would then answer to help you complete the person-to-person call.

Please allow at least 30 seconds for all foreign calls to go through.

area codes speed your long distance calls

The U. S. and Canada are divided into more than 120 telephone areas. Each area has a 3 figure area code. Your area code is 704 (see map). The area code of the telephone you are calling should be dialed or given to the operator if it is different from the area code of the telephone you are using. It should not be used if it is the same. (When placing call with operator, say, for example, "I want area code 311-555-2368.") When you give someone your telephone number, include your area code if he needs it to return your call. A list of selected area codes is on pages 5-9. Area codes for other places may be obtained from the OPERATOR.
